INTRODUCTION

The Numismatic Society of India feels pleasure in publishing this *Bibliography of the Coin-hoards found in Gujarat State* compiled by Dr. P. L. Gupta, in the NUMISMATIC NOTES AND MONOGRAPH SERIES, which is meant for bibliographies coin-lists, inventories, indices, special essays and other useful handy materials relating to Indian coins, medals and seals and other allied subjects.

It is needless to say that the coin-hoards are one of the valuable sources of information on many obscure points of history. But this material is not readily available to scholars. It is therefore neccessary that all material, published and unpublished, relating to coin-hoards be brought at one place in a convenient manner. This is only be possible if Bibliographies of the finds be adequately published. Keeping this in view, the Society has already published two Bibliographies, one relates to the Punch-marked coins and the other covers the finds of the Ancient coins from Madhya Pradesh. Now, this is the third, which deals with the finds of the Gujarat State.

PREFACE

Prior to 1878, there was no law in India to control properly the finds of the Treasure Troves. In that year, for the first time an act was passed to regulate the Treasure Trove finds; but it was left to the Presidency Governments to enforce it in the manner they might think proper. In Bombay Presidency, which then included the present Gujarat and Maharashtra states, by a resolution, it was required that coins found in any part of the Presidency should be submitted to the Bombay Branch of Royal Asiatic Society for opinion. An option was given to the Society to retain such coins, that the Society might wish to keep on paying the price placed on them according to their value as metal. Society, if the finds were submitted to them, selected from the coin-hoards only those coins, which appeared to them of some interest and of which no specimens were in the Society's collection. As such, even after the Act was passed, it brought no useful results. The Society's interest being limited, it did not took any interest in having detailed reports of the finds. Consequently, we know little, what finds came to the Society.

In 1884, a new arrangement for the dealing with the coins found under the Treasure Trove Act made under the resolution No. 46/166-32 dated 9th October 1884 of the Government of India. Under this resolution, the Collectors and the District Officers were instructed to acquire any coin found, which appeared to be old and not of the British mintage. The coins so acquired were to be sent to the Asiatic Society of the Presidency in which they were discovered and the Society concerned was to report to the Local Government, in whose province they were found, their number and nature as well as their probable numismatic value. On reciept of the Government's sanction, the Society of the Presidency distributed one specimen of each coin, that Society might have reported to be worth preserving to certain public institutions and the rest sold at the mint. Accordingly, the Bombay Branch of Asiatic Society continued to recieve the coins from the District authorities and distribute them. But no records was ever maintained by the Society of the finds that came to it. In its Annual reports the Society referred to the finds; but the information given there is most sketchy, nothing useful can be made out of these Reports.

What arrangement had the Society for the examination of the coins during the early period is not known. It appears that in about 1905, Mr. Henry Cousens, the then Suprintendent of Archarology of Western India was doing this work for the Society. Then the work was entrusted to H.R. Scott, who has published the Jogelthembi Hoard of the counter-

CC-0. Agamnigam Digital Presevation Foundation, Chandigarh

struck Nahapana coins. In 1909, the work was undertaken by Messrs Ganapatrao K. Tuarekar and F. J. Thanawala. Mr. Thanawala did this work till his death in 1917; and Mr. Tuarekar was replaced at some time by Prof. S. R. Bhandarkar. In 1918, Mr. Whittel alone did the reporting of the coins for the Society. Then, during 1919-21, Mr. R. D. Banerji did this work. Since 1922, the work of the examination of the coins was entrusted to the Prince of Wales Museum, Bombay. There Muhammad Ismail did this work at the begining. Then Messrs C. R. Singhal and G. V. Acharya undertook the examination of the coins. After the retirement of Shri Acharya, Shri R. G. Gyani took his place in 1932. Since then Messrs Singhal and Gyani were responsible for the examination of the coins finds. In 1953 Shri Gyani died and in 1954 Shri Singhal retired from the Museum. After them, the compiler of this *Bibliography* was appointed Numismatist at the Museum, and he examined the coin hoards till he left Bombay in 1963.

Working with the coins, since long I had been realising the neccessity of the study of the coin-hoards in their entirity. I had also felt the handicaps, with which the scholars are suffering on this account. So, when I went to Prince of Wales Museum, Bombay and had the occassion of examining the coin-finds, I came to know that the examiners of the coin-hoards at the Museum had maintained a record of the reports that they were sending to the Bombay Branch of the Asiatic Society. This was readily available to me, and it formed the basis of this Bibliography. Examination reports for the finds earlier than 1922 could no where be available. For the information of the pre-1922 finnds, I had to depend upon the *Journal of the Bambay Branch of the Asiatic Society*, which refers to some finds but does not give any detail. So, the earlier finds could find only a bare mention here. Attempt has been made to supplement the information from other sources, but without much success.

The present Bibliography covers only those finds that were found within the territory of the present Gujarat State. Sindh once formed the part of the Bombay Presidency. So, many hoards of that area also were coming to Bombay for examination. I have taken this occassion to record them here also. Here 126 finds are entisted from Gujarat and 13 from Sindh.

This Bibliography was ready with me, when I was at Bombay, but for many unavoidable reasons, it could not be published till today.

I hope this *Bibliography* would be of some use to the numismatists and historians.
